# Cool Defined

We call it the Minami 5, and it's what differentiates Minami from all other fish oil.

- 1**  
*Supercritical Difference*

**SUPERCritical DIFFERENCE**—Minami's Dual Supercritical Technology means up to 400% less heat than other processes.
- 2**  
*Concentration*

**CONCENTRATION**—Minami formulas are among the most highly concentrated omega-3 products on the market, meaning fewer capsules and less fillers like saturated fats.
- 3**  
*Purity*

**PURITY**—Minami oils go through rigorous third-party testing and have remarkably low levels of oxidation as well as undetectable levels of dioxins, pesticides and heavy metals like mercury.
- 4**  
*Unique Formulations*

**UNIQUE FORMULATIONS**—Minami is committed to the advancement of omega-3 scientific research and Minami oils have been used in 11 published clinical trials. Minami uses the latest clinical research to produce fish oils that have specific EPA-to-DHA ratios.
- 5**  
*Environment Footprint*

**ENVIRONMENTAL FOOTPRINT**—Sustainable fish species, low heat processing and a unique energy efficient manufacturing facility guarantee that Minami has the smallest environmental footprint possible.

## PLATINUM

PLUS VITAMIN D<sub>3</sub>  
SUPERCritical OMEGA-3 FISH OIL

THOSE WHO WILL BENEFIT: People who want an ultra-premium, convenient, once daily fish oil with the highest available omega-3 concentration and added vitamin D<sub>3</sub> in one capsule.†
